

Listen2Future

Newsletter 2. November 2024

Dear colleagues,

We are thrilled to bring you the second edition of the Listen2Future Newsletter, your gateway to the latest updates and insights from the Listen2Future project.

As 2024 draws to a close, we'd like to share some of the year's most noteworthy news.

In February, Listen2Future celebrated its first General Assembly at the prestigious Infineon Technologies AG in Munich. It was inspiring to meet all partners in person, discuss research progress, and agree on the best ways to collaborate on the year ahead.

Now, as we approach our second anniversary, the project has entered a more intensive phase, yielding exciting new outcomes. It's been a highly productive year, with our team publishing over a dozen **papers in top-tier journals**, bringing our total publications close to 60 since the project's inception. Our team members have actively participated in **industry conferences, workshops**, and other **scientific events**, helping to disseminate our findings and foster essential idea exchanges that drive scientific advancement.

In addition, we're excited to share a series of videos highlighting the dedicated teams and **individuals** behind the project. We've also released three new podcast episodes over the past few months, offering a deeper look into our research and providing researchers with a platform to share their perspectives on the current and future impact of this work on society. Our **LinkedIn page** has been a key channel to share all these achievements and inspirational stories to our more ever increasing audience of more than 170 followers and the wider communities.

Now, take a minute to watch and listen to our stories below.

Listen to Our Podcasts

Antoni Ignasi, from the Univ of Granada & SMD Group, gives us an insight into the use of ultrasound stimulation on hair follicle stem cells. [Listen here.](#)

Guillermo Rus, from the University of Granada, talks about the use of mechanical waves to impact cancer cells phenotype and its prospects. [Listen here.](#)

Javier Jiménez, Founder and CEO of Kriba talks about his work and the impact it could have in health globally. [Listen here.](#)

Watch Our Videos

Panel discussion: Multimodal ultrasonic application for cancer treatment

Use case 1: Towards the future of medical ultrasound probes

Use case 4: Ultrasonic stimulation of hair follicle stem cells for hair implant

Use case 5: Fighting cancer with mechanical waves

Use Case 6: Developing better microphone technology for hearing aids

Use case 7: Next generation of ear probes for objective audiometry

NEWS

In the coming weeks, Listen2Future will be presenting at the European Forum for Electronic Components and Systems (**EF ECS 2024**), Europe's premier forum for advancing growth and innovation in the sector. Taking place in the historic city of Ghent, Belgium, on December 5-6, 2024, this event gathers industry leaders, policymakers, researchers, and innovators, offering us an exciting opportunity to share our work with an even broader audience.

Finally, we're happy to announce that our next General Assembly will be held at the **University of Granada** on 10-11, February, 2025. The University of Granada and the **SMD Group** are looking forward to welcoming our colleagues to the home of one of the oldest and most prestigious universities in Spain.

Stay Always Up to Date

We hope this edition gave you fresh insights and inspiration with our hand-picked podcasts, videos, and news stories. Remember, these conversations only get better when shared. So, if

something here resonated, challenged, or excited you, pass it on to a friend, a colleague, or your social network! Let's keep building this community together.

Warm regards,

Your Listen2Future team
